# Welcome to our Gin Club, a collection of exceptional gins for your enjoyment.

Some things are quintessentially British – Fish and chips, a cup of tea, visiting the seaside in the rain, and of course, above all: the humble gin and tonic.

To celebrate our love affair with this fine spirit we have brought in a range of 6 gins, representing a cross section of flavour profiles.

Gin has a dark history, dating back to the 1600's in Holland, Genever was created from juniper and grain spirit, often used in medicine. At this time, the death rate outstripped the birth-rate - attributed to the consumption of poor quality gin, and the coining of the notorious nickname Mother's Ruin was born. It an attempt to stop this deadly 'craze' several gin acts were bought in, outlawing production. This of course drove it further underground and the situation worsened.

It was not until the last Gin Act of 1751, known as the "Tippling Act" that things finally started to change.

Exporting duties were removed in 1850 which opened spirit trade up to a number of new markets. Notably India, where the raj were combating malaria by combining the medicinal benefits of juniper with that of quinine, often dissolved in tonic.

The invention of the carbonated quinine drink, tonic water, saw the birth of what we know as the G&T, which is how the majority of us still consume our gin today.

Over the next century the popularity of gin and the cocktail culture continued to rise, but this halted in the second part of the 20th century and gave way to vodka based drinks. The first turning point of the gin resurgence was in 1987 when Bombay Sapphire launched – changing many people's perception of gin.

Other brands such as Hendrick's and Tanqueray were born, and as the trend for artisanal and 'craft' products in other markets grew in popularity, the ban on the capacity production of 1800 litres was lifted – opening the door for small batch production gins.
